## **PROJECT DESIGN PHASE-II**

## **TECHNOLOGY STACK (ARCHITECTURE & STACK)**

Date	15 October 2022	
Team ID	PNT2022TMID08369	
Project Name		
Maximum Name	4 Marks	

## **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table

**Table 1: Components & Technologies:** 

S. No	Component	Description	Technology
1.	User Interface	How user interacts with the	App development
		Web UI	
2.	Application Logic-1	Logic for a process in the	Python
		application	Objectives
3.	Application Logic-2	Logic for a process in the	IBM Watson STT
		application	service

4.	Application Logic-3	Logic for a process in the	Node-RED service
		application	
5.	Database	Data Type	Database
			Cloudant DB
6.	Cloud Database	Database Service on Cloud	Cloud Object store
			service
7.	File Storage	File storage requirements	IBM Block Storage
•	Infrastructure (Server /	Application Deployment on	Cloud Foundry
	Cloud)	Local System / Cloud Local	
		Server Configuration:	
		Cloud Server Configuration:	

S. No	Characteristics	Description	Technology
1.	Open-source	The open-source	SAN-SAF
	Frameworks	frameworks used	
2.	Security	List all the security /	IBM cloud
	Implementations	access controls	encryptions
		implemented	
3.	Scalable Architecture	Justify the scalability of	IBM cloud
		architecture (3 – tier,	Architecture
		Micro-services)	
4.	Availability	Justify the availability of	Web Application can
		applications (e.g. use of	even be used by the
		load balancers,	framers in the
		distributed servers etc.)	horticulture
5.	Performance	Design consideration for	Since the web
		the performance of the	application is highly
		application	efficient, it can be
			used by the farmers
			irrespective of time.
